

Spartan Explorer

Spartan Explorer is the fansite (with the potential to turn university-operated) for anyone hoping to explore Michigan State University's campus. There are many wonderful secrets hidden throughout the grounds of Michigan's finest school. The website will document, provide photos, and promote the many things to do on campus, including: museums, libraries, sports arenas and fields, study lounges, memorial sites, impressive facilities, history, free events, and giveaways.

The website will have, at minimum, a simple set of profiles organized by type, kind of like a database. Either in the initial product, or in a later release, the website may include a map integration, allowing people to locate the attractions visually, and plan sightseeing routes or stops accordingly.
